

ARTIFICIAL INTELLIGENCE

Course Description

Artificial intelligence is a branch of computer science in which we study the design of such a type of machine which can think like a human. Since a machine can think and work like a human in a more efficient way it can reduce the number of people for any task or project. Artificial intelligence is a branch of computer science in which we study the design of such a type of machine which can think like a human. Since a machine can think and work like a human in a more efficient way it can reduce the number of people for any task or project.

Artificial Intelligence Course Content

Module 01 : OVERVIEW OF AI

Module 02 : INTELLIGENT SYSTEMS

Module 03 : RESEARCH AREAS OF AI

Module 04 : AGENTS AND ENVIRONMENTS

Module 05 : POPULAR SEARCH ALGORITHMS

Module 06 : FUZZY LOGIC SYSTEMS

Module 07 : NATURAL LANGUAGE PROCESSING

Module 08 : EXPERT SYSTEMS

Module 09 : ROBOTICS

Module 10 : NEURAL NETWORKS What are Artificial Neural Networks

Module 11 : AI ISSUES

Module 12 : AI TERMINOLOGY

What We Try to Give

We try to give you real industry standards with best possible quality to all our customers and clients. We focus on various sections of Society and running a national level campaign to literate Students from all parts of company who can't Afford "Basic IT Computer Training". We wish we could teach as many students from all over the world and make it a beautiful place to work. We work on minimum gross margins to strength the Indian It infrastructure.
